Skills

Front-end: React JS, Next JS, Redux, CSS, Bootstrap, Tailwind CSS, JQuery, Shadcn, Styled-components.
Back-end: Node JS/Express JS, Mongoose, Prisma, Nest JS, Firebase, JWT.
Language: Javascript, Typescript.
Database: MongoDB, Postgres.

Projects

Auto-X (Car-rental)   [Live](#) | [Client Code](#) | [Server Code](#)

Technologies: Typescript, Next JS, Redux, Shadcn, Express JS, Prisma, Postgres, Es-lint, Prettier, Husky.

- User-friendly UI/UX design with functionalities like search and filtering and a dynamic and seamless booking process.
- Responsive and Role-based Dashboard.
- User Dashboard: For general users to manage accounts and profiles.
- Admins wield centralized control over accounts, bookings, users, drivers, and content through the admin dashboard.

Media-Book   [Live](#) | [Client Code](#) | [Server Code](#)

Technologies: Express, Mongoose, MongoDB, React, Redux, Material UI, React Dropzone, Formik, Yup.

- Leveraged Material UI to ensure design consistency and create a user-friendly interface with modern and responsive UI components.
- Developed social networking features, enabling users to make friends, view profiles, and zoom and save images seamlessly.
- Implemented post functionalities, allowing users to upload posts, comment on them, and like posts, enhancing user engagement and interaction.
- Integrated React Dropzone to provide a smooth and intuitive file upload experience.

GoTrip - (Service Provider FullStack Website)   [Live](#) | [Client Code](#) | [Server Code](#)

Technologies: Typescript, Express JS, Prisma, Postgres, Next JS, Redux, Material Tailwind, JWT.

- Implemented features for users to browse easily, and book services with functionalities such as pagination, search, filtering, and sorting.
- Designed a user-friendly system for leaving reviews and ratings for services.
- Three Types of Dashboard. User Dashboard: This is for general users to manage profiles, book services, and provide feedback; Admin Dashboard: This is the central control for administrators handling accounts, listings, and content.
- Enabled super admins to add and manage admin, users, providing control over user roles and personal profiles.
